

Type: DR 37 G-240-16 Cast top

Heavy duty off road
Applications: Low Loaders
Step Deck Trailers
Tankers

Standard with 16 mm base plate
optional: 20mm Base Plate

DR 37 G-240-16

D-Value	162.4kN
Overall height	358 mm
Imposed load	21000 kgs
Gross comb. weight	125000 kgs
Weight approx.	518 kgs
(for 16mm base plate)	
CRN	24839

Twin lockouts.
Flush bolt heads on mounting plate in chassis mounting zone.
Jsk 37 G-240 fifth wheel coupling for operation under arduous conditions.
The well known JOST locking device together with the maintenance free cardan mounting ensures a high degree of stability and safety on the road and off road.

The lateral movement of 7° is designed to compensate for the roll between the truck and semi-trailer during off-road use. On the road, and especially at higher speeds, it must be locked at 3° or blocked for safety reasons.

Lock jaw and wearing ring can be replaced without difficulty in a few minutes with the fifth wheel still in position.

Mounting must be carried out in accordance with our instructions.
